School Intervention Programs

*Inspiring Change...
By Nature.*

Leadership Development Program

Our leadership development program is an excellent opportunity for highly motivated students with a strong potential for becoming dynamic leaders. NVW helps strong students become even stronger as they participate in experiential workshops, leadership development curriculum, low ropes course initiatives, and extended wilderness trips. This program helps students work through fears and concerns while promoting positive leadership and teamwork throughout the 5 day trip in the wilderness of northern Wisconsin.

Truancy Abatement Program

Truancy is an ongoing issue that is impacting schools throughout the nation. NVW truancy program intervenes at the core school issues that create truancy for each student individually. These interventions often include an in-depth examination of the family's view of education, school stressor identification, and stress management skills development while immersed in a wilderness setting. Every student leaves our truancy program with a School Intervention Summary. This summary includes recommendations which the school and family can implement to more effectively manage the student's truancy related issues.

At-Risk Youth Program: Master Minds Violence Prevention/Intervention

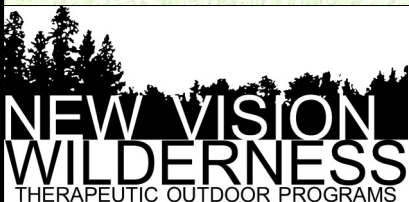

NVW excels at intervening with At-Risk youth populations that may be violent or bullying in your school. The sources of these behaviors are individualistic in nature. NVW targets the core issues that are causing an individual student to act out. Our At-Risk program targets core issues of family systems, anger management, Alcohol and Other Drug Abuse, and more. This course utilizes cutting edge technology from HeartMath, current brain research, and effective forms of psychotherapy.

Expulsion Diversion Program

NVW Expulsion Diversion Program is an effective program to offer as an alternative to a permanent expulsion from your school. During their attendance students will be required to complete workbooks and be involved in groups specific to the issue causing expulsion. These programs range from Master Minds Rage Management to Alcohol and Other Drug Abuse intervention. Youth are immersed in a face to face look with whatever school issue is causing potential expulsion. Youth are returned to school with a School Intervention Summary that contains recommendations for the student, family and school staff to implement in order to prevent further potential expulsions. These programs are generally offered in a 5 or 7 day format.

Staff Team Building

NVW staff will come to your school and work directly with the school faculty. These staff workshops offer an excellent opportunity to have fun while building staff cohesion and exploring and discussing issues. This individualized workshop is designed to target the specific goals of the school.
